

TruClean Cabinet Washers

Front Load Model 3048

FRONT LOAD CABINET WASHER

The front load washer is designed for large batch production work.

The front load washer is designed with a hinged vertical door allowing parts to be loaded from the side manually, with a fork lift or overhead material handling. Single parts, multiple parts or even fully loaded part racks can be placed on the process table for cleaning. During processing the table rotates and stationary nozzle assemblies deliver highly aggressive spray and provide complete 360° spray coverage. Process time is variable to allowing cleaning cycle adjustment for multiple requirements.

Cabinet Washer Features:

- 5-HP Wash Pump
- Electric Solution Heat - 140° F, 185° F Approx. Max.
- Solution Tank Capacity - 100 Gallons
- Pump & Heater Protection (Tank Low Level Shut Down)
- Removable Spray Pipe c/w High Pressure Spray Nozzles
- Hinged Front Load Door
- 30" Diameter Heavy Duty Rotating Process Table
- Sprocket Type Process Table Drive
- Gear & Motor Drive Assembly
- 48" Clear Process Height
- 1500 lb. Load Capacity
- Stainless Steel Tank & Housing
- Load Door Safety Switch
- Electrical Control Panel – 220/1/60 – 460/3/60
- Disc Oil Skimmer
- Automatic Water Make Up c/w Soap Injector
- Programmable Controller (c/w onboard I/O)
 - Built-in textual HMI panel
 - Unitronics Jazz/M91 Series All-in-One PLC
 - Variable Wash Cycle Timer
 - Programmable Heater Timer - 7 Day

Available Options:

- Solution Filter
- Ball Type Drain Valve - 2" NPT

Approximate Dimensions:

7'- 10" High x 5'- 4" Wide x Length x 4'- 2" Deep

Delivery:

Ten (10) Weeks

Oil Skimmer and Tank Low Level Switch

Heavy Duty Rotating Process Table
