

TruClean Cabinet Washers

TOP LOAD CABINET WASHER

The top load cabinet washer is a perfect fit for small batch production and repair type work cells with tough cleaning requirements.

The top load wash system is designed with a hinged horizontally opening lid allowing the operator to lower parts into the cleaning cabinet. Parts are placed stationary inside the process basket while a rotating nozzle assembly delivers highly aggressive spray at 360°. Process time is variable allowing cleaning cycle adjustment for multiple requirements.

Cabinet Washer Features:

- 1-HP Wash Pump
- Electric Solution Heat - 140° F, 185° F Approx. Max.
- Solution Tank Capacity - 40 Gallons
- Pump & Heater Protection (Tank Low Level Shut Down)
- Removable Debris Tray – Sump Tank Debris Containment
- Rotating Manifold c/w High Pressure Spray Nozzles
- 18.5" Deep x 15" Wide x 17" High Parts Process Basket
- 500 lb. Load Capacity
- Stainless Steel Tank & Housing
- Load Door Safety Switch
- Electrical Control Panel – 220V/1/60
- Disc Oil Skimmer
- Automatic Water Make Up c/w Soap Injector
- Programmable Controller (c/w onboard I/O)
